

Hands-on Lab : Using File Explorer to Manage Files and Folders

Skills
Network

Estimated time needed: **20** minutes

Objectives

In this hand-on lab, you will:

- Employ Microsoft Windows File Explorer for file and folder navigation
- Construct a new folder called “Office files”
- Use LibreOffice to create a new document and to add text to that document
- Use the “Office files” folder structure as the LibreOffice document file location
- Identify the stored path of the new Project 1 document

Important Notices about This Lab

About Lab Sessions

Lab sessions are not persisted. This means that every time you connect to this lab, a new environment is created for you. Any data or files you saved in a previous session are no longer available. To avoid losing your data, plan to complete these tasks in a single session.

About the Lab Instructions and Solutions

In case you try to use your physical keyboard in the lab environment, it might not produce any visible results. To avoid this issue, please use the On-Screen Keyboard (you can find it by searching for "On-Screen Keyboard" in the search bar at the bottom of your screen). If search functionality doesn't work, you can also click on the Windows icon, scroll down to find Windows Ease of Access, click on it, and then select On-Screen Keyboard.

Microsoft Windows operating system features can vary based on the Windows edition. If completing these exercises on your machine, your navigation and solutions may differ from what's presented in this lab.

Exercise 1: Employ Microsoft Windows File Explorer for File and Folder Navigation

1. Select **File Explorer**.

2. Navigate to **Documents**.

Exercise 2: Construct a New Folder Called Office Files

1. To create a new folder called **Office files**, right-click, select **New**, and click **Folder**.

2. Type the name of the folder as **Office files** and press **Enter**. You will see that a new folder named **Office files** has been created.

Exercise 3: Use LibreOffice to Create a New Document and Add Text to the Document

1. Select **Start** and select **LibreOffice**.

2. Next, select **LibreOffice Writer**. A blank document file opens.

3. Now, add text to the file and keep the file open.

Exercise 4: Use the Office files Folder Structure as the LibreOffice Document File Location

1. Using the LibreWriter menu, select **File** and select **Save As**.

2. Type the name of the document as **Project 1** and change the save location to the Libre file in the Office file folders, then click **Save**.

3. Then click the X icon to close LibreOffice Writer.

Exercise 5: Identify the Path of the New Project 1 Document

1. On the desktop, double-click to open the **File Explorer** tile.
2. Within **Quick access**, you can see a file named **Project 1** inside the **Recent files** folder. Next to the file name, you can see the path of the file as **This PC\Documents\Office files**.

Practice Exercises

1. Problem: How can you create a new folder named **Employees** inside **Documents**?

- ▶ Click here for a hint.
- ▶ Click here for the solution.

2. Problem: How do you create a file named **Department** inside the **Employee** folder?

- ▶ Click here for a hint.
- ▶ Click here for the solution.

3. Problem: How can you identify the path of the **Department** file?

- ▶ Click here for a hint.
- ▶ Click here for the solution.

Congratulations! You have completed this lab and are ready for the next topic.
