

Glossary: IP Addressing, Routing and Switching

Welcome! This alphabetized glossary contains many of the terms you'll find within this course. This comprehensive glossary also includes additional industry-recognized terms not used in course videos. These terms are important for you to recognize when working in the industry, participating in user groups, and participating in other certificate programs.

Term	Definition
ACK (acknowledgment)	ACK represents the word "acknowledgement." An acknowledgement message sent by the receiver to indicate successful receipt of a packet.
Dynamic Host Configuration Protocol (DHCP)	Dynamic Host Configuration Protocol (DHCP) automatically assigns IP addresses to devices on a network.
File Transfer Protocol (FTP)	File Transfer Protocol (FTP) is the protocol that transfers files between a client and server on a network.
Hypertext Transfer Protocol (HTTP)	Hypertext Transfer Protocol (HTTP) is the foundation of data communication on the World Wide Web.
HTTP Secure (HTTPS)	HTTP Secure, or HTTPS, is an encrypted version of HTTP for secure communication over a computer network.
Internet Protocol Television (IPTV)	Internet Protocol Television (IPTV) delivers television content over Internet Protocol networks.
Simple Mail Transfer Protocol (SMTP)	Networks use the Simple Mail Transfer Protocol (SMTP) to send and route email between mail servers.
Simple Network Management Protocol (SNMP)	The Simple Network Management Protocol (SNMP) collects and organizes information about managed devices on IP networks.
Secure Sockets Layer (SSL)	; Secure Sockets Layer (SSL) is a deprecated protocol for establishing encrypted links between a web server and a browser.
SYN (synchronize) request	A SYN request is the initial packet in the TCP three-way handshake to establish a connection.
Transmission Control Protocol (TCP)	The Transmission Control Protocol (TCP) provides reliable, ordered, and error-checked delivery of data packets.
Three-way handshake	A three way handshake is the process used to establish a connection between a client and server in TCP.
Trivial File Transfer Protocol (TFTP)	Trivial File Transfer Protocol (TFTP) simple, lockstep FTP that allows a client to get or put a file onto a remote host.
User Datagram Protocol (UDP)	User Datagram Protocol (UDP) is a connectionless protocol for sending messages with minimal protocol mechanisms.
VoIP, or Voice over IP	Voice over IP (VoIP) is a technology that enables voice calls using a broadband Internet connection instead of a regular phone line.
