

Lab: Assess Job Postings

Estimated time needed: 30 minutes

In today's competitive job market, every company is looking to hire the best candidate. At the same time, as a candidate, it is important that you select job postings that increase the chances of an interview but more importantly, align with your aspirations.

Objectives

In this lab, you will:

- Shortlist cybersecurity specialist or analyst job postings from job sites, such as Indeed.com and ZipRecruiter.
- List the required cybersecurity skills for the selected job postings.
- Perform a gap analysis between skills required for the job and your current skills.

Prerequisites

- You have been provided a Template/Answer spreadsheet for this lab. The documents are in Microsoft Excel format. It would help if you had Excel installed on your computer or a Microsoft 365 online account. You can also open Excel documents using other spreadsheet application software, such as Google Sheets.
- Review the following:
 - Video: **Conducting Company Research**
 - Reading: **Finding Job Postings**

Instructions

Task 1: Explore job posting

1. Explore job sites for cybersecurity specialist or analyst positions in your preferred location.
 - As you review the job posting, navigate to the company's website and review the About Us and their service offerings.
 - Alternatively, search for project manager positions at the company of your choice.
2. Shortlist three cybersecurity specialist or analyst job postings that interest you.

Task 2: List the required skills and other job details

1. Review the position requirements and document the following:
 - Responsibilities
 - Skills and competencies required
 - Experience and expertise
 - Industry information
 - Company values, vision, mission, and goals
 - Any implicit requirements

Task 3: Analyze the skill gaps and create an action plan

1. Open the **Cybersecurity Skills Inventory** spreadsheet that you updated with your current and intended skill levels in the [Perform Skills' Readiness Check](#) lab.
2. Analyze if your current skill level qualifies you for the job positions.
3. Create your action plan to gain skills required to apply for a preferred project manager position.
