

Lab: Develop a Professional Portfolio

Estimated time needed: 30 minutes

A portfolio that showcases your accomplishments is an effective way to impress a hiring manager and the best way to stand out from the crowd.

Objective

In this lab, you will develop a professional portfolio.

Prerequisites

- You have been provided a Microsoft (MS) PowerPoint presentation template for this lab. You should have either MS PowerPoint installed on your computer or a Microsoft 365 online account. You can also use other presentation application software like Google Slides to open MS PowerPoint files.
- Review the following:
 - Video: **Illustrating a Cybersecurity Professional's Portfolio**
 - Reading: **Purpose and Value of a Professional Portfolio**

Instructions

1. Keeping the CTRL key pressed, click [here](#) to download the **Professional Portfolio** presentation.
Note: Use the COMMAND key instead of CTRL on Mac systems.
2. Complete the information on the different slides.

Slide #	Description
1	Brief introduction
2	Agenda of the portfolio
3	Create a miniature persona for yourself
4	Add a favorite quote
5	Education and Experience
6	Pictures of you at work
7-9	Work samples
10	Professional references
11	Closing summary
12	Thank You!

Please refer to the notes in the PowerPoint for guidance on how to complete your portfolio effectively. For example, the image displays the instructions on how to complete the first slide.

Welcome to a brief overview of how to develop a personal work portfolio.

As we shared in an earlier reading, a personal portfolio is a great way to showcase your work and demonstrate you have the skills required to satisfy a potential job role.

A portfolio can be a hard copy document or an electronic one.

Share your name, title, and contact information. Always include a picture. Try to share a variety of pictures throughout the portfolio.

Provide a brief introduction. Tailor your introduction so that it resonates with the audience you are sharing your portfolio with

3. After creating your portfolio, save the file.

4. Optionally, you can share the portfolio with peers and elicit feedback. Depending on the feedback, you can update your portfolio as needed.
