

Lab: Draft a Basic Resume

Estimated time needed: 30 minutes

A resume is mandatory when applying for jobs. Depending on the job, you may need to customize your resume. However, the very first step is to create a basic resume.

Objectives

In this lab, you will draft a basic resume.

Prerequisites

- You have a Template/Answer sheet in Microsoft Word for this lab. You should have either Microsoft Word installed on your computer or a Microsoft 365 online account. You can also use other word processing application software, such as Google Docs, to open word documents.
- Review the **Drafting a Resume** video.

Instructions

In this lab, you will complete three tasks. You will start with collecting information for the resume. Then, you will add the details to the selected resume template.

Task 1: Resume inputs

Note: It is highly recommended that you create your resume using the **Resume Input Worksheet** to ensure you have all the key information. However, if you are confident about the key information for the resume, you can skip this step.

1. Keeping the CTRL key pressed, click [here](#) to download the **Resume Input Worksheet** Microsoft (MS) Word document.

Note: Use the COMMAND key instead of CTRL on Mac systems.

2. Review the columns in the **Resume Input Worksheet** document.
 - **Resume Entry** lists the key information critical to the resume.
 - **Entry Description/Guidance** guides what the key information should contain.
 - **Example** of details in a given resume area.
 - **Your Input** to enable you to add your details.

Resume Letter Entry	Entry Description/Guidance	Entry Example	Your Input
Name and Title	▪ Display in large font on the top of the resume	<i>Antonio Fernandes</i> <i>Technical Support Engineer</i>	
Contact Information	▪ Include in the upper portion of the resume either beside or after your name and title ▪ Always include your e-mail and telephone contact information ▪ Provide a hyperlink to your LinkedIn profile Note: Your full address is not necessary on a modern resume	Antonio_Fernandes@dotemail.com (617)-958-4561 Boston, MA LinkedIn: (Link)	
Brief Description	▪ Provide a brief introduction that shares a value statement applicable to the position you are seeking	<i>I have been working as a Technical Support Engineer for the past two years. I have a good understanding of IT infrastructure and digital assets. I have a basic understanding of cybersecurity concepts and have completed the Certified in Cybersecurity (CC) certification. I am proactive and have an analytical and problem solving mindset, which align with the demands of a Cybersecurity Specialist role.</i>	
Skills (Emphasis on software and technical applications used on the job)	▪ List as one of the first sections of your resume ▪ List as many skills as possible with an emphasis on the skills required for	▪ IT infrastructure ▪ Cloud computing ▪ Identity and access management (IAM) ▪ Microsoft Office and other proprietary applications	

	- your intended position ▪ May use a list format or add levels of mastery ▪ Delete unnecessary skills for the position you seek			
Work Experience	▪ This is the largest section of your resume ▪ List in chronological order—current to past ▪ Share firm and your title ▪ List start and end dates ▪ List four to five bullet statements using the format: ACTION-TASK-RESULT Note: This is a good place to provide a link to your personal portfolio	<i>Upton Ltd.</i> <i>Technical Support Engineer</i> <i>January 2022 – February 2024</i> ▪ <i>Research, diagnose, and troubleshoot issues to find resolution.</i> ▪ <i>Follow standard operating procedures to escalate the issue to the appropriate team</i> ▪ <i>Coordinate with various teams for progress status</i> ▪ <i>Helped users respond to security alerts and error messages</i> ▪ <i>Work with customer to provide accurate resolution and ticket status</i> ▪ <i>Update tickets accurately</i> ▪ <i>Prepare weekly reports</i> ▪ <i>Maintain customer rapport</i>		
Education and Certifications	▪ List your highest level of education ▪ Combine certifications with education or list separately ▪ List certifications that impact the position you are seeking	Education ▪ <i>BS Computer Science, Cornell University, 2017-2021, Cornell, NY</i> Certifications ▪ <i>Certified in Cybersecurity (CC)</i>		

3. Enter your details.

4. Save the file.

Task 2: Add details in the selected resume template

Next, transfer the details to a resume template.

Step 1: Select a resume template you prefer

1. Search for templates online.

Note: Several websites, such as Microsoft.com, offer free resume and cover letter templates.

2. Select a template that meets your resume needs.

Step 2: Draft the basic resume

1. Add the key information from the **Resume Input Worksheet** into the selected resume template.

2. Save the resume.

Note: Depending on the job requirements, you can refine the basic resume to introduce keywords that increase your chances to get an interview.

Step 3: [Optional] Share your resume with peers, family, and friends

1. Share your resume with peers, family, and friends.

2. Assess peer feedback and update your resume as needed.
