

Final Project Overview

Estimated time needed: 5 minutes

This project will consist of four phases and their related tasks. Each phase is linked to a module from the course:

- Phase 1: Governance, risk, and compliance
 - Task: Identify the critical elements of a GRC framework that Nerdnest needs to implement
- Phase 2: Foundations of IT service management
 - Task: Identify and apply the ITIL processes to Nerdnest
- Phase 3: Understanding cybersecurity laws and regulations
 - Task: Identify and apply laws related to Nerdnest's operations
- Phase 4: Understanding cybersecurity audits
 - Task: Identify the benefits of conducting regular cybersecurity audits and explain how Nerdnest can prepare for an audit

You will make decisions and provide recommendations based on the scenario presented.

A total of **30 points** are assigned across **twelve questions** in the project. Your final project will be AI-graded. You need to complete the tasks and submit your responses for review.
