

Explore the IBM X-Force Threat Intelligence Index

Estimated time: 30 minutes

What is the IBM X-Force Threat Intelligence Index?

The IBM X-Force Threat Intelligence Index, an annual report created through extensive analysis of security events, provides insights into the current cybersecurity landscape. The report tracks changes, analyzes security trends and patterns, identifies emerging threats and vulnerabilities, and provides strategic guidance to help organizations strengthen their security posture and defend against cyberattacks.

The IBM X-Force Threat Intelligence Index 2024 is based on insights and observations from examining over 150 billion security events per day in over 130 countries. In this activity, you will research and review the IBM X-Force Threat Intelligence Index 2024 to gain insights into cybersecurity trends and the threat landscape.

Learning objectives

After completing this activity, you will be able to:

- Identify the components of the IBM X-Force Threat Intelligence Index 2024
- Identify key cyber threat trends highlighted in the report

Instructions

1. Download the X-Force Threat Intelligence Index 2024 [here](#).
(*Note: You need to "Right-click" on the link and select "Save link as" to download the X-Force Threat Intelligence Index 2024 PDF.*)
2. Familiarize yourself with the report's structure. Ensure to pay close attention to the data gathering and analysis methodologies.
3. Identify key cyber threat trends highlighted in the report and note any changes or emerging patterns since the previous index.
4. Compare the findings outlined in the index with current cybersecurity events and analyze their correlation with real-world occurrences.
