

Additional Resources

Estimated time needed: 10 minutes

Overview

The following resources provide detailed guidelines and standards for understanding, identifying, and mitigating injection vulnerabilities.

Open Web Application Security Project (OWASP):

- **OWASP Top 10:** The document lists the most critical web application security risks, such as injection flaws, and provides detailed descriptions, examples, and prevention techniques.

Link: [OWASP Top 10](#)

- **OWASP SQL Injection Prevention Cheat Sheet:** The cheat sheet provides practical tips and best practices for preventing SQL injection attacks.

Link: [OWASP SQL Injection Prevention Cheat Sheet](#)

- **OWASP Command Injection Prevention Cheat Sheet:** This cheat sheet is similar to the SQL Injection Prevention Cheat Sheet and focuses on preventing command injection vulnerabilities.

Link: [OWASP Command Injection Prevention Cheat Sheet](#)

National Institute of Standards and Technology (NIST):

- **NIST Special Publication 800-53:** It offers a comprehensive catalog of security and privacy controls for federal information systems and organizations, including guidelines for protecting databases and applications from injection vulnerabilities.

Link: [NIST SP 800-53](#)

- **NIST Special Publication 800-95:** The document focuses on web services security and provides recommendations for preventing injection attacks in web applications.

Link: [NIST SP 800-95](#)

Center for Internet Security (CIS):

- **CIS Controls:** The CIS Controls are a set of best practices for protecting IT systems and data from cyber threats, including injection vulnerabilities. Control 18 covers Application Software Security, including mitigating injection attacks.
