

# Glossary: Understanding Cybersecurity Laws and Regulations

Welcome! This alphabetized glossary contains many of the terms you'll find within this course. This comprehensive glossary also includes additional industry-recognized terms not used in course videos. These terms are important for you to recognize when working in the industry, participating in user groups, and participating in other certificate programs.

| Term                                                                              | Definition                                                                                                                                                                                                                                            |
|-----------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Administrative safeguards                                                         | Involve policies and procedures showing how the entity complies with the HIPAA Act.                                                                                                                                                                   |
| Authorized Vendors (ASVs)                                                         | Authorized scanning vendors scan and evaluate businesses annually or quarterly.                                                                                                                                                                       |
| California Consumer Privacy Act (CCPA)                                            | A law emphasizing consumer privacy rights within the state.                                                                                                                                                                                           |
| Children's Online Privacy Protection Act (COPPA)                                  | An act passed in 1998, focuses on safeguarding childrens' privacy on the internet.                                                                                                                                                                    |
| Computer Fraud and Abuse Act (CFAA)                                               | An act created in 1986 to prevent data theft and misuse and to discourage cybercrime by making it a federal offense to access a computer without authorization or to go beyond what permission allows.                                                |
| Consumer Protection Act                                                           | A collection of various consumer protection laws (both federal and state) that protect buyers from fraudulent practices when they buy products or services.                                                                                           |
| Cybersecurity Enhancement Act                                                     | An act created in 2014 to strengthen and protect the nation's economy by boosting cybersecurity. It supports the development of better cybersecurity technologies, research, development, and partnerships between the government and private sector. |
| Data Protection Officer (DPO)                                                     | A dedicated person or team responsible for monitoring compliance with various data protection laws.                                                                                                                                                   |
| Electronic Communications Privacy Act (ECPA)                                      | An act passed in 1986, expanded government rules on wiretaps (listening in on phone calls) to cover electronic data transmissions through computers.                                                                                                  |
| Family Educational Rights and Privacy Act (FERPA)                                 | Enacted in 1974, protects the privacy of student education records.                                                                                                                                                                                   |
| Federal Information Security Management Act (FISMA)                               | An act passed in 2002, aimed to strengthen computer and network security in the federal government and among its contractors.                                                                                                                         |
| General Data Protection Regulation (GDPR)                                         | A comprehensive law ensuring robust data protection and privacy for EU and European Economic Area residents.                                                                                                                                          |
| Gramm Leach Bliley Act (GLBA)                                                     | An act passed in 1999, regulates how financial institutions handle people's private information.                                                                                                                                                      |
| Homeland Security Act                                                             | An act created in 2002 by the Department of Homeland Security to boost cybersecurity in the US. It included measures to share information about cybersecurity threats better.                                                                         |
| Health Insurance Portability and Accountability Act (HIPAA)                       | An act passed in 1996, provides data privacy and security provisions for safeguarding medical information.                                                                                                                                            |
| HHS Security Risk Assessment Tool                                                 | A crucial resource that the U.S. Department of Health and Human Services provides to help healthcare providers and their business associates comply with the HIPAA Security Rule.                                                                     |
| Identity Theft and Assumption Deterrence Act                                      | An act passed in 1998, made it a federal crime to knowingly use someone else's ID with fraudulent intentions.                                                                                                                                         |
| National Institute of Standards and Technology (NIST) HIPAA Security Rule Toolkit | Developed by the National Institute of Standards and Technology (NIST), this toolkit provides tools that help organizations assess their adherence to the security requirements set forth by HIPAA.                                                   |
| Patriot Act                                                                       | Enacted after September 11th, 2001, aimed to strengthen domestic security broadly.                                                                                                                                                                    |
| Payment Card Industry Data                                                        | A set of security requirements designed to protect card information and prevent data breaches.                                                                                                                                                        |

|                                                                              |                                                                                                                                                                                         |
|------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Security Standard (PCI DSS)</b>                                           |                                                                                                                                                                                         |
| <b>Personal Information Protection and Electronic Documents Act (PIPEDA)</b> | A law in Canada impacts global operations beyond their originating country.                                                                                                             |
| <b>Physical safeguards</b>                                                   | Protect electronic systems, equipment, and the data they hold from threats, environmental hazards, and unauthorized intrusion.                                                          |
| <b>Privacy Rule</b>                                                          | A part of HIPAA focuses on the rights of individuals over their health information.                                                                                                     |
| <b>Protected Health Information (PHI)</b>                                    | Specifies that individuals have rights over their health information and outlines how and when their information can be disclosed.                                                      |
| <b>Sarbanes–Oxley Act (SOX)</b>                                              | Enacted in 2002, ensures that investors get accurate and reliable corporate information.                                                                                                |
| <b>Security Rule</b>                                                         | A part of HIPAA sets the standard for patient data security, requiring covered entities to implement three types of safeguards: administrative, physical, and technical.                |
| <b>Technical safeguards</b>                                                  | A part of the security rule in HIPAA, involves the technology, policy, and procedures for its use that protect electronic protected health information (ePHI) and control access to it. |
| <b>USA Freedom Act</b>                                                       | An act passed in 2015 made to reform some of the practices authorized under the Patriot Act. It aimed to find a better balance between security and privacy.                            |
